

TO: All MUNFA Members
FROM: The MUNFA Executive Committee
DATE: October 25, 2019
SUBJECT: **MUNFA Decarbonization Working Group**

The MUNFA Executive recently established a decarbonization working group. The work of the group is defined by a commitment to decarbonizing the university in line with what the IPCC has determined is necessary to achieve no more than 1.5°C of global warming. Specifically, this means the university achieving net carbon emissions decline of 45% from 2010 levels by 2030 and reaching net zero carbon emissions by 2050. MUNFA members are invited to join the working group to set priorities and advance the work of achieving the decarbonization of Memorial University, including through MUNFA's participation in the MUN Climate Action Coalition.

If you are interested, please contact MUNFA's Membership Engagement Coordinator, Travis Perry, at membership.munfa@mun.ca by **Friday, November 1st**.
