

MEMORIAL UNIVERSITY OF NEWFOUNDLAND

Audit Report

Audit Title:

COVID-19 Capacity and Traffic Flow assessment
Health and Safety Compliance Audit

Conducted:

June 2nd-July 7th, 2021

Audit Team Members:

Marsha Matthews
Kelly Taylor

Audit Status:

A Adequate
OFI Opportunity for Improvement
NC Non-Compliant

1.0 BACKGROUND

Memorial University is preparing for the return to on-campus teaching and learning for the Fall 2021 semester. To decrease the risk of COVID -19 at Memorial, preventive measures are put in place to both educate and protect its faculty, staff and students along with the general public. From June 2 - July 7, 2021, Environmental Health and Safety (EHS) unit of the Office of the Chief Risk Officer conducted a capacity and traffic flow assessment of the St. John's and Signal Hill campuses. The assessment took place in the student classrooms and building entry points. The buildings and classrooms were assessed for capacity and traffic flow in accordance with the COVID-19 prevention measures by Newfoundland and Labrador public health.

2.0 SCOPE

The scope of the audit was to evaluate Memorial's St. John's and Signal Hill campuses to determine adherence with public health guidelines to ensure the health and safety of faculty, staff and students along with the general public.

3.0 METHODOLOGY

The audit process provides a benchmark and identifies areas that are deemed **Adequate (A)**, **Opportunity for Improvement (OFI)** or **Non-Conformance (NC)**. Adequate means that during the audit process, compliance with government guidelines was demonstrated. **Opportunity for Improvement (OFI)** means evidence is presented for the effectiveness of the process, however, additional measures are recommended. **Non-compliant (NC)** means that the items audited did not demonstrate compliance.

A detailed audit checklist was developed from a review of the Newfoundland and Labrador public health guidelines for COVID-19. This checklist served as a standard to conduct each of the audits.

Audit methodology included:

- Field assessment and point in time observations of each classroom and building.

4.0 AUDIT RESULTS

4.1 Table 1: Audit Results

A total of 384 classrooms and 408 external doors were audited. Table 1.0 highlights the compliance rate for each criteria audited.

CLASSROOMS	REQUIREMENTS	SUMMARY	COMPLIANCE RATE
Access	COVID-19 Signage at building entry points	126 Classrooms out of 384 require signage	67%
	Hand sanitizer available	81 Classrooms of 384 require cleaner/hand sanitizer	79%
Ventilation	Mechanical	5 Classroom without Mechanical Ventilation	99%
	Operable windows	72 rooms with operable windows	N/A
	Screens in operable windows	56 Classrooms of the 384 require screens.	22%
Seating	Fixed or moveable seating	50 Fixed seating 130 moveable	N/A
# Doors	Number of doors per classroom - assign entrance and exit only.	53 classrooms have more than one door.	N/A
BUILDING ACCESS			
Signage	Signage to be located at building entry points	146 Entrances out of 408 entrances assessed require signage	64%
Hand Sanitizer	Signage to be located at building entry points	94 entrances out of 408 entrances assessed was missing hand sanitizer	77%
High traffic entrances	Doors identified as high traffic entrances without hand sanitizer or signage.	68 entrances out of 110 high traffic entrances	38%

Table 1.0 Audit Results.

The audit identified six (6) opportunities for improvement. Appendix A has a detailed list of audit findings.

- Five (5) classrooms do not have mechanical ventilation. However, these five (5) do have windows for natural ventilation. Therefore, no non-compliances for ventilation.
- 81 classrooms require surface cleaner in the classroom.
- 56 classrooms require window screens in their operable windows.
- 53 classrooms have more than one door which can allow for designation of one way traffic flow. Signage is required for these rooms.
- 126 classrooms require additional signage.
- 68/110 high traffic door entrances require hand sanitizer and/or door signage. This should be a priority since faculty and staff returned to campus on July 13, 2021.

Please note: While classroom SN -2000 had both mechanical and operable windows there are ventilation concerns as the windows are blocked by an adjacent building which restricts air flow and the mechanical ventilation didn't appear to be working properly at the time of the assessment.

5.0 RECOMMENDATIONS

Upon completion of the assessment of the St. John's and Signal Hill campuses the following recommendations were highlighted to reduce the spread of COVID-19.

- Hand sanitizer to be place in more noticeable places (often placed to the side and difficult to see).
- Hand sanitizer to be place at all building entry points.
- Ensure a process is implemented so that hand sanitizer is being replenished when low/out.
- Signage to be place at all entrances to classrooms, buildings and required traffic flow areas.
- Screens to be placed in windows that are operable.
- Adjustments made to windows difficult to open (i.e. Arts Building and Physical Education Building).
- Forward Appendix A to Facility Management to address action items as appropriate.

6.0 CONCLUSION

During the assessment, staff at the University were knowledgeable and helpful when discussing the COVID-19 audit criteria and expressed concerns with the re-opening of the university. COVID-19 protection measures were implemented in the high traffic building entrances and classrooms that remained open, however, signage and hand sanitizer need to be replenished and with the University fulling reopening additional measures are required to ensure the health and safety of its faculty, staff, students and general public.

The audit did not find any non-compliances only recommendations for improvement that should be considered and implemented. During the audit it was noted that the university was at a reduced occupancy which can also impact the reporting of hazards such as the low hand sanitizer and lack of signage. With faculty, staff and students on site it is anticipated that this will continue to improve since it will be reported by building occupants as another level of control.

Ventilation is an important control in the spread of COVID-19 and the audit concluded that all classrooms were compliant with ventilation requirements. With the measures currently in place, additional measures are recommended before the student's arrival in the Fall of 2021 to ensure the health and safety of its faculty, staff, students and the general public.
